

CNC Cylindrical Grinders

The FANUC high performance control has been developed exclusively for the cylindrical grinding industry. The canned cycles and the custom Macro B package featured in the control give the machine the versatility and speed demanded to accomplish the grinding needs of the industry.

With the marriage of the FANUC control and the ECOTECH GRINDER, we have developed a state-of-the-art CNC Cylindrical Grinder with the simplicity of programming today's most complex parts.

All of ECOTECH'S CNC Grinders have heavy aged cast iron construction, that has been precision machined and hand scraped. With a Hydro-Dynamic spindle on the wheelhead, and the Hydro-Static lubrication system on the table, these machines will give you many years of trouble free operation and high accuracies.

Series	Max O.D.	Lengths Between Center	Max Workload	Wheel Size(DxWxID)	Wheelhead Hp.	Machine Weight
MK1320	8.00	20.0 – 30.0	400 lbs	16x2x8 inch	7.5 hp	7,059 lbs
MK1332	12.00	20.0 – 120.0	400 lbs	24x3x12 inch	15 hp	8,820 lbs
MK1350	20.00	40.0 – 315.0	2,205 lbs	30x3x12 inch	20 hp	24,255 lbs
MK1363	25.00	80.0 – 160.0	6,608 lbs	30x3x12 inch	15 hp	52,255 lbs
MK1380	32.00	120.0 – 197.0	6,608 lbs	30x3x12 inch	20 hp	41,413 lbs
